

DLA 23-2014 GMO-Screening qualitative: Maize and Soya

terms

Test material :

There are 5 different test samples (pastries, cereal products, dietetic powder) containing GMO-ingredients from Bt11-Maize and/or RR-Soya.

GMO-Addition: Bt11-maize flour and Round-Up Ready containing soy products. The material is tested for homogeneity.

Order :

Registration deadline is 12th May 2014.

The reliable order can be sent to our partner Coring System Diagnostix, can be faxed to us, DLA, using attached order form, or using the order form available from www.dla-lvu.de. The minimum number of participants is 10.

Sample shipment :

The samples will be sent to participating laboratories in the week 20. Each participant receives 5 different test samples, 10 g each.

Invoicing / Price :

The price for the proficiency test is 205,-- € / participant plus shipping and tax. Shipping and invoicing to

other countries than Germany is done by our partner Coring System Diagnostix. Invoices are payable within 2 weeks, for participants from Non-European countries pre-payment is required.

Realisation :

There is a 6 weeks time for performing the analysis. The method of analysis is optional. Deadline for results submission is 27th June 2014.

Submission should be done by e-mail with a prepared excel-file, available from DLA.

DLA intends to finish the evaluation within 8 weeks after deadline for the results.

Evaluation is strictly qualitative (positive/negative) for each of the 5 samples. Single results, limits of detection and details about the method of analysis will be documented as submitted.

Each participant receives an anonymized, complete analysis report, identifying the own results by individual code in case payment was done.
