There are **two different samples A and B** with possible contents of **Gluten (Barley Malt, *Hordeum vulgare*)** in the range of mg/kg in the **matrix "gluten-free" beer**.

Sample weight: 2 Samples 50ml each

* Note: Qualitative tests and testing of the content, homogeneity and stability of PT parameters are carried out by DLA. Additional tests can be subcontracted by DLA.

Methods + realisation time:

Analytical methods for qualitative and quantitative determinations are optional (e.g. ELISA, LFD, PCR and LC-MS).

There is a 4 weeks period for performing the analysis. The results are transmitted online via our customer portal.

Evaluation report:

The **evaluation** is carried out **qualitatively** (positive/negative) and from a total of 5 results on **quantitatively**. It includes kernel density estimation, outlier tests, robust mean, robust standard deviation and z-scores. The assigned value is the robust mean of participants results. Results, limits of detection and/or quantification and remarks to the methods will be documented. DLA intends to finish the evaluation report within 6 weeks after deadline of results submission. Each participant receives an anonymized, complete evaluation report as a PDF-file, identifying the own results by individual code in case payment was done and can object in writing to the evaluation within 6 weeks.

Individual participant data will only be shared with third parties with the participant's prior consent or due to legal requirements. When sharing or publishing PT data or evaluations for scientific, educational or promotional purposes, all information will be anonymized to ensure the participant's confidentiality.
